AUTISM & WANDERING PREVENTION TIPS
 promoting safety in the home & community

49% wander

Similar to the wandering behaviors in seniors with dementia or Alzheimer's, children and adults with autism spectrum disorder (ASD) are prone to wandering away from a safe environment. Because many children with ASD have challenges in areas of language and cognitive function, it is critical for parents to understand ways to keep their child or adult with autism safe.

- Install Home Safeguards**
 - Install secure locks (entrance door), home security system or door/window alarms, fence gates, alarm gates, large garage opener out of reach, use baby monitors and visual prompts like simple sign tips.
- Secure Personal Safeguards**
 - Have wearable identification on your child. Temporary tattoos are great for hot days and other outings. Check with local law enforcement to see if they offer tracking devices.
- Create Community Awareness**
 - Alert trusted neighbors, and introduce them to your child. Fill out an alert form for local police, include a current photo and unique characteristics, likes, fears, and behaviors; alert the school, and bus drivers.
- Remain Hyper-Vigilant**
 - Stay on extra high alert during warmer months, holidays, vacations, camping trips, bus/travel periods, outdoor gatherings, or event travel to a new home or school, visiting an unfamiliar setting, public settings.
 - Initiate a "tag, you're it" system during family gatherings and transitions. Tag one responsible adult to closely supervise your child for an agreed-upon period of time.
- Identify Triggers/Teach Self-Help**
 - Be aware of any known triggers that could prompt leaving (loud noises, bright lights, fans, etc.) and work towards teaching your child safe alternative ways to respond.
 - For an individual who demonstrates leaving behavior due to fear or stress, etc., use calm, soft or non-verbal handshakes, and teach calming techniques using favorite topics or items.
- Teach Safety Skills**
 - Enroll your child into swimming lessons. Final lessons should be with lifelines and shoes on.
 - Use social stories to teach individuals with autism ways to stay safe, and use favorite objects or tools to demonstrate when it's suitable time versus "not time."
- Call 911**
 - Remain calm and always call 911 immediately if an individual with ASD is missing, law enforcement should treat each case as "critical."
 - Law enforcement agencies are encouraged to contact the National Center for Missing & Exploited Children at 1-800-THE-ONE (1-800-843-5874) for additional assistance.
- Search Water First**
 - Immediately search areas that pose the highest threat first, such as nearby water, busy streets, busy tracks, and parked cars.
