

WHO WILL SPEAK FOR YOU WHEN YOU CAN'T SPEAK FOR YOURSELF?

The "Yellow Dot" Program is the Vial of Life for your car. It gets important information to emergency responders quickly and can save your life!

If you are involved in a car accident and can't communicate, first responders can look in your glove box for the "Yellow Dot" card that carries important medical information about you.

This lifesaving information can help rescue crews decided how to treat you appropriately. This is especially important after a car accident where you may be unconscious, in shock or simply unable to communicate clearly.

Do the Dot!

Just follow these three steps:

1 Fill out the form on this brochure.

2 Put the Yellow Dot form in your glove box.

3 Peel off the sticker and place it on the driver's side rear window.
